

2021 F=ma Exam: Problem 3

Kevin S. Huang

Balancing torques, we have

$$F(2\text{ m}) = N(1\text{ m})$$

$$F'(2\text{ m}) = N(0.5\text{ m})$$

Dividing these two equations,

$$\frac{F}{F'} = 2$$

Thus, $F' = F/2$ so the answer is B.
